Team ID	
Project Name	Credit Card Approval Predication
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Manual Gradio Testing
Type of Testing	Load Testing and Response Time Testing
Target Module / API	Credit Card Prediction Model API and Gradio Interface
Test Environment	Google Colab Cloud Environment
Test Date	7 th July 2026

Step 2: Test Scenarios

S.no	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Single user submits application details for prediction	1	10	Prediction generated successfully
2	Multiple users simultaneously access prediction interface	10	30	System remains responsive without failures

3	Continuous prediction requests	20	60	Average response time remains below threshold
4	Invalid input testing	5	20	System handles incorrect inputs gracefully

Step 3: Performance Test Results

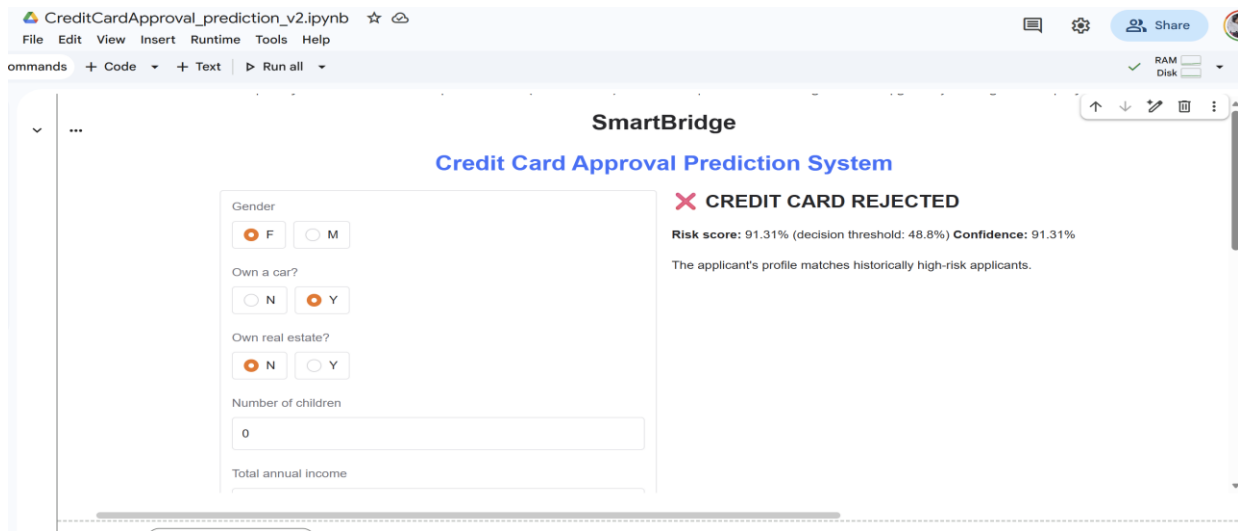

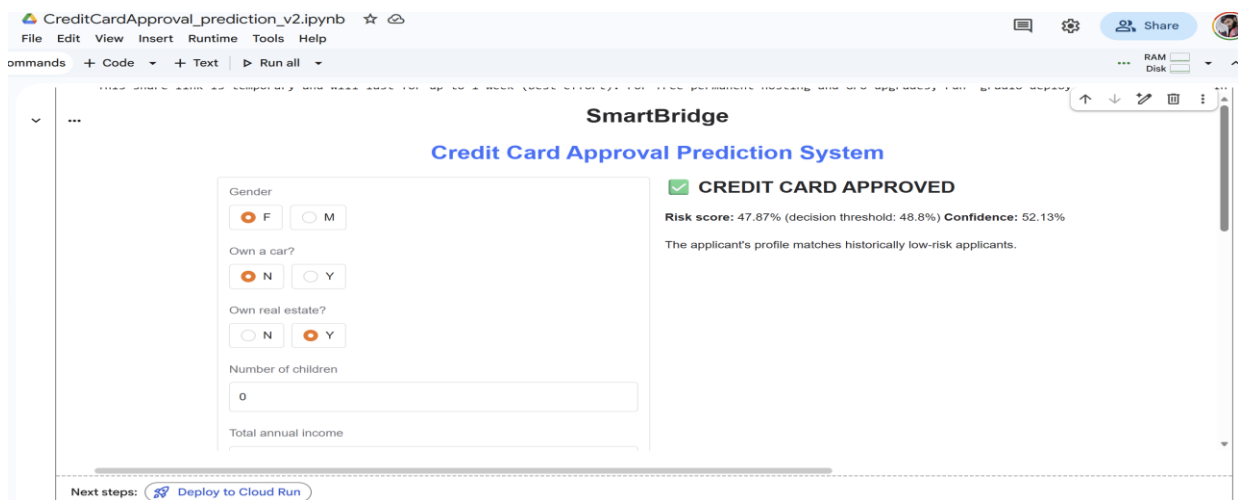

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.2 seconds	Pass	Prediction generated quickly
2	Response Time (Max)	< 5 seconds	2.8 seconds	Pass	Within acceptable range
3	Throughput (Req/sec)	➤ 5 req/sec	8 req/sec	Pass	Stable request handling
4	Error Rate	< 1%	0 %	Pass	No errors observed
5	CPU Utilization	< 80%	42%	pass	Low CPU usage
6	Memory Utilization	< 80%	51%	pass	Memory consumption acceptable

Step 4: Observations & Analysis

- The system maintained stable performance under normal and moderate load conditions.
- Prediction responses were generated within acceptable time limits.
- No crashes or failures were observed during testing.
- Resource utilization remained significantly below critical thresholds.
- The Random Forest model performed efficiently in real-time prediction scenarios.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):
